Minimalism, functionality and versatility are the key terms to describe this NINA collection. The NINA was designed to meet multiple lighting requirements, an ideal solution for accent lighting in residential or commercial spaces. The rotating function of the lamp is allowing the user to move the luminaire in a very dynamic and fluid way, with no sight into the ceiling regardless of position. The length of the tube can be adjusted in accordance with the project needs, the lamp can be rotated up to 350° around the room.
