WING is a wall-mounted architectural eye-catcher. It is hard to describe this light fitting in either words or images. Call it the three dimensional development of a cube on paper: from reality to abstraction and back. A cube on paper consists of two overlapping squares. The fitting is available in two versions each forming the mirror image of the other. Add an extra dimension with installations that play with a downlighter and an uplighter. Thanks to IP40, WING can be used in the areas where water proof is required.
