The SLOT light effect tops any expectation. The unique design of this bollard and the positioning of the 10W LED results in maximum beam spread and a powerful play of light, providing an expressive and architectural touch to your project. The position of the led avoids direct exposure and dazzle, without compromising the light output. The SLOT can be installed on any hard surface, when combined with a pin it can be planted in any green surrounding. Available in 2 versions with one side light and double side.
